

PropelUAS

BY EVANS INCORPORATED

IDEA to OPERATIONS, take your UAS implementation to the next level while driving top efficiency and value throughout the process

Strategy – Program planning and assessments, business case development, futures strategy planning, long-range capital investment planning, leveraging industry best-practices

Operations – Operations development, planning, execution, and performance monitoring, certificate of authorization (COA) and waiver consulting, part 107 training and training development for COA

Safety Management – Safety Management Systems (SMS) design and implementation, stakeholder and operator safety facilitation, and safety specific training for initial and ongoing support of operations

Risk Mitigation – Enterprise risk management systems to maximize outcomes and ensure safety and compliance every step of the way

PropelUAS takes your questions about what's possible, allowable, and sustainable to near-zero so you can focus on the value-add impact of UAS to your strategic plan

- **Minimize Regulatory Risk** – Through our implementation of UAS regulations at the Federal Aviation Administration
- **Applied Expertise** – Certified operators, air traffic controllers, human factors specialists, air traffic trainers, and aviation consultants
- **Proven Unmanned Systems ROI – Real Operational Impact™** that saves up to 20% of the time needed to get from **Idea to Operations**
- **Safety in Numbers** – With over 20 years of corporate and well over a century of staff experience in the Aviation industry
